

SaadAI Insight

AI Automation Knowledge Base

Version 1.0

1. About SaadAI Insight

Q: What is SaadAI Insight?

A:

SaadAI Insight is an AI automation company that helps businesses automate repetitive work using artificial intelligence, large language models (LLMs), workflow automation, retrieval-augmented generation (RAG), chatbots, and custom AI solutions.

2. Services

Q: What services do you provide?

A:

We provide:

- AI Chatbots
- Customer Support Automation
- AI Email Assistants
- WhatsApp AI Bots
- RAG Chatbots
- AI Document Search
- Multi-Agent AI Systems

- n8n Workflow Automation
 - CRM Automation
 - Business Process Automation
 - AI SaaS Development
 - Custom AI Solutions
-

Q: What industries do you work with?

A:

We work with companies in:

- Healthcare
 - Education
 - E-commerce
 - Finance
 - Legal
 - Real Estate
 - Human Resources
 - Manufacturing
 - Logistics
 - Startups
 - Marketing Agencies
-

Q: Do you build custom AI solutions?

A:

Yes.

Every solution is customized according to the client's business requirements.

Q: Can you automate my business?

A:

Yes.

We analyze your existing workflow and automate repetitive tasks using AI and no-code automation platforms such as n8n.

Q: What is AI automation?

A:

AI automation combines artificial intelligence with workflow automation to perform tasks that normally require human effort, such as responding to emails, analyzing documents, extracting information, generating reports, and communicating with customers.

Q: What is n8n?

A:

n8n is an open-source workflow automation platform that connects different applications and automates business processes. We use n8n to create scalable automation systems.

Q: What is a RAG chatbot?

A:

A Retrieval-Augmented Generation (RAG) chatbot retrieves information from your documents before generating a response. This makes answers more accurate and reduces hallucinations.

Q: Can you integrate with our existing software?

A:

Yes.

We integrate with:

- Gmail
- Outlook
- Slack
- Microsoft Teams
- WhatsApp Business
- Telegram
- Discord
- Shopify

- WooCommerce
- HubSpot
- Salesforce
- Google Drive
- Dropbox
- Airtable
- Notion
- Stripe
- Supabase
- PostgreSQL
- MySQL
- Pinecone
- OpenAI
- Gemini
- Claude

Q: Which AI models do you support?

A:

We work with:

- OpenAI GPT models
- Google Gemini
- Anthropic Claude
- Mistral
- Llama

- DeepSeek
- Ollama (local AI)
- IBM watsonx.ai

Q: Can you build local AI solutions?

A:

Yes.

We build private AI systems using Ollama and open-source LLMs that run entirely on your own servers.

Q: How long does a project take?

A:

Small automation projects usually take 3–7 days.

Medium projects typically require 2–4 weeks.

Large enterprise projects depend on complexity and requirements.

Q: Do you offer maintenance?

A:

Yes.

We provide ongoing maintenance, monitoring, bug fixes, performance optimization, and feature updates.

Q: How can I request a quotation?

A:

Please email us with:

- Business name
- Project description
- Current workflow
- Desired outcome
- Timeline

We will review your requirements and respond with a proposal.

Q: What information should I include when contacting you?

A:

Please include:

- Your company name
- Industry
- Project requirements

- Budget (optional)
- Deadline
- Existing software
- Contact information

Q: Do you provide free consultations?

A:

Yes.

We provide an initial consultation to understand your business needs and recommend suitable AI solutions.

Q: Do you develop AI SaaS products?

A:

Yes.

We design and develop complete AI SaaS platforms including authentication, payment integration, dashboards, AI agents, document processing, APIs, and cloud deployment.

Q: What technologies do you use?

A:

Our technology stack includes:

Python

FastAPI

Flask

LangChain

LangGraph

CrewAI

OpenAI

Gemini

Claude

Docker

Supabase

Pinecone

ChromaDB

MongoDB

PostgreSQL

n8n

React

Next.js

Vercel

Azure

AWS

Q: How can I contact SaadAI Insight?
